Area of use:	according to EU-Norms
Licensing:	CE
Warranty:	2 years
Accessories:	Line cable (2m), cover, suction rubber pear, replacement fuse, instruction manual

Dimensions

Dimension incl. receiving tray:	1110 (max.) x 365 x 450 mm (l x h x w)
Length of receiving tray:	400 mm
Weight incl. receiving tray:	32.1 kg

Powerful and reliable sealing and counting at the same time!

With this machine you are able to seal and count envelopes simultaneously. The machine with integrated counter can be used as a sealer and/or counter. Thanks to its deeper design this new series "MERCURY S2" is particularly suited for all common standard envelopes with the formats C5, C6/5, C4, B4 and C4 pocket (324x229mm) with the flap on the short side.

The "MERCURY S2" series is available in 4 versions:

This series is equipped with the "piling option" as standard, which allows to seal normal stacked envelopes and nested envelopes. Depending on the version it can also be equipped with the integrated infrared photoelectric switch system for the automatic START / STOP function and/or an integrated counter.
